About

Bio

First-year B.Tech Computer Science Engineering student at VIT Bhopal University. Currently learning Python and Web Development, with a growing interest in Artificial Intelligence and Cloud Computing.

- Certified by Google (Gemini AI)
- Oracle (Cloud Infrastructure AI Foundations)
- Kaggle (Python).

"Currently exploring Web Development — diving into HTML, CSS, and JavaScript — alongside Java to strengthen my programming fundamentals."

I don't like just copying answers — I prefer to understand how and why things work. And if I ask something, I've already tried solving it first.

About

I'm a first-year CS student in Software & Technology, and I'm genuinely excited about what this field can do — not just the code, but the real problems it solves for real people.

I care deeply about writing clean, thoughtful work and bringing curiosity to everything I build. For me, it's never just about getting something to work — it's about understanding why it works and how it can be better.

I'm someone who takes ownership, asks questions, and isn't afraid to learn in public. I believe the best engineers are the ones who stay humble and keep growing.

I'm currently looking to learn, build, and connect with people who share the same passion for technology.
